DETAILED ACTION

Response to Amendment

1. The amendment filed November 7, 2007 has been entered; no new claims have been introduced.

Response to Arguments

2. Applicant's arguments, see page 6, filed 11/7/2007, with respect to claim 22 have been fully considered and are persuasive. The rejection under 35 USC §112, first paragraph of claim 22 has been withdrawn.

Allowable Subject Matter

3. Claims 22, 24, 25, 27-33 and 59-63 are allowed.
4. The following is an examiner's statement of reasons for allowance: Anderson (USPN 6,859,227), a closely related art, fails to disclose a method comprising controlling each photoreceptor in an array of photoreceptors to transfer its photoelectrically induced signal to a storage node located within a respective semiconductor well region formed in a semiconductor substrate, wherein each storage node is doped to a first conductivity type, and wherein a portion of each semiconductor well surrounding each storage node is doped to a second conductivity type. The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to carry out the method of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
